**David Dube, Founder and Head Trader**

From M Kessler's recommendation, I began my 3 month real-time review of this room on 11.25.2015. I first looked at the historical track record and found it detailed – showing trade by trade, 1 contract/trade, over 5 months. Extrapolating net profits to 12 months at 3 contracts/trade, it was in great excess of my required \$50K/year with good daily trade rates. I then petitioned for an opportunity to review this room for trading transparency so that I could verify that trades were called were transparent that I could see, understand and replicate as called. I found head trader David Dube (30 yr. financial market veteran - Lehman Brothers; UBS as Head Trader in biotechnology and software stocks) very pleasant, relaxed and sincere in his trading, admixing trading mentorship, expert interpretations and insightful thinking in of market dynamics and daily trading. His trading incorporates several disciplines (market profile, price action, statistical volume analysis) which can be taught in an easy to learn format. Trade calls and executions were 100% transparent and clearly showed intended entries before trades were filled. While trading both CI and ES greatly exceeded a net of  $\geq$  \$50K/yr., David exhibited an average P/L for CL that is one of the very best in the industry. And both indices can be traded using his Auto-Trade Assistant that uses a CCI X-Over System with reliable execution and clarity.
